Case Study Improve Cost of Expendable Packaging

Challenge:

A customer approached GSS to design a returnable, but still expendable, unit to ship 400,000 ATV units annually, with pricing that would be equal to or less than their current spending.

Customer Impact:

The customer is spending thousands of dollars on packaging that is only single-use packaging and not returned.

GSS Solution:

GSS redesigns the formerly expendable shipping container and sets up a custom-designed Return Program.

Conclusion:

The customer now saves approximately \$20.00 on each container processed through the system. Based on a 50% return rate, the customer saved \$4M annually.

We have the design knowledge to help you save money.
